

MAKE WEALTH, NOT WAR

*A MESSAGE FROM JOSE VEGA, INDEPENDENT CONGRESSIONAL CANDIDATE
15TH C.D., BRONX, NEW YORK CITY*

“Once to ev’ry man and nation, comes a moment to decide.”

This is such a moment for the United States. Our Constitution is under a state of siege, from forces, such as those in the present Administration, that are driving us headlong into thermonuclear war. We don’t even know any longer who’s giving the orders in Washington. Biden was forced to abdicate—not resign, but abdicate—because his controllers didn’t want the American people to see that, given his condition, someone else, or some committee, is acting as President—and none of us voted for them. There has been a coup against the American Presidency, and we don’t know, nor are we allowed to know, who is in charge.

What is the price of this to the American people? Look closely at the Biden Administration’s response to Hurricane Helene. In 2005’s Hurricane Katrina, with all the problems, we had 20,000-plus National Guardsmen, as well as Army support. This time, there are less than 7,000. Where are they? Where is the Army? In Kuwait, Iraq, Jordan, Syria, Poland, Romania, maybe

Ukraine—but not here. So our people have died by the hundreds in the Southeast, and the toll could be well over a thousand. Is this what the Biden Administration calls “national security?”

Reporter Malcolm Kyeyune wrote, “Those I have spoken to in North Carolina describe a disaster of “biblical dimensions”. The only thing that comes close to it in recent history is the “Great Flood” of 1916 in North Carolina,...During Katrina, more than 350 military helicopters were involved with the rescue efforts. This time, in a mountain disaster zone where many more helicopters are needed than in a coastal area, well below 100 helicopters have currently been committed.” Outrageously, “A decent portion of the Tennessee National Guard, rather than helping rescue Americans in their own home state, are currently deployed to bases in Kuwait... This means that even though the victims of hurricane Helene have found themselves stranded within a stone’s throw of some of the US military’s more significant military bases — Camp Lejeune and Fort Liberty are both located in North Carolina — very

little help has been forthcoming.”

I, Jose Vega, will not be silenced in the face of this assault on the General Welfare of Americans. When I interrupted the lying “Nobel Prize-winning” economist Paul Krugman at City College of New York Tuesday night, I said, “Uh oh! ‘No-Ball’ prize-winning economist here to tell us how great the economy is. I certainly wonder how great the residents of Asheville, North Carolina, must be feeling right now with no access to power or water or communication with the outside world!

“I wonder how enthusiastic they are about the economy right now. I wonder how enthusiastic the residents of the South Bronx must be feeling about the economy. Hey, maybe North Carolina should name itself Israel, so it can get \$20 billion in aid, or Ukraine, so it can get \$300 billion in aid.

Maybe the South Bronx should do the same thing. I’m sure the economy is great for smug liberals like yourself who make \$5 million...” This apparently stung Krugman so much that he lied about who I was and what I said. Then, he wrote an op-ed that appeared in the New York Times. I couldn’t figure out why at first, but now I think I know.

You see, I also had said, “Hey, is anyone going to talk about the fact we could be in a war with Iran in a few days? Or do we need to focus on the S&P 500? Is that what really matters, the S&P 500, when most people may not even be alive in a few days

just because we are on the verge of nuclear war?... All that stock market money goes to the military-industrial complex so that more innocent women and children are dead!”

That’s what they don’t want the American people to realize. We are inches away from thermonuclear war because of the addiction to murder, mayhem and money by the “War Party.” Why do you think Dick “Halliburton” Cheney, and his evil offspring, Liz Cheney, would endorse Kamala Harris? There’s a history going back to 2001 of contracts involving the Cheney family and the British Ministry of Defense, including its Minister of State for Defense Procurement, Baroness Symons. And we all know the British role in the Ukraine War, including Keir Starmer’s recent attempt to convince Biden to allow long-range weapons to strike into Russia, as well as Boris Johnson’s destruction of peace talks in March of 2022.

If we are even going to get to the November 5 elections alive, before a nuclear war happens, either by accident, or by design, we had better shut these people down—now—by waking the American people up—now! Do what I do, and intervene!! What you do, not on Nov. 5, but between now and November 5, to stop the wars, cut off the war funds, and use human and material resources to aid Americans in distress, can save the lives of our people—and people all over the world.
